Fall Prevention in Wheeled Mobility Device Users with MS

Are you interested in research?

We are currently conducting a research study to examine ways to prevent falls in individuals living with Multiple Sclerosis who use a wheelchair for community mobility. You will be compensated \$100 for participation.

To participate in this study, you must be:

- ≥18 years old
- Diagnosis of Multiple Sclerosis
- Main form of mobility is via a wheelchair or scooter
- Able to transfer either with moderate assistance or less
- Have experienced at least one fall in the past 12 months
- Able to sit upright for at least 1 hour

During participation, you will be asked to attend 3, 2-hour study assessments over a period of 32 weeks. In addition, if you participate in study intervention, you will be asked to participate in 6, 2-hour education sessions over consecutive weeks.

Would you like to participate?

If you are interested, please contact DPQoL Lab at dpqoluiuc@outlook.com.
